## FILE INFORMATION FOR OPTIMAL ENTRAINMENT RESULTS

We strongly recommend not converting your downloaded files to a smaller MP3 format, because the increased MP3 compression will filter out a considerable amount of the entrainment power embedded in the high quality MP3 file.

## HEADPHONES

For the fullest entrainment effect, it is recommended to use good quality headphones when listening to *Light at the Break of Midnight*.

## COMPATIBLE PLAYERS

Compatible with all MP3 and WAV players.

## IMPORTANT!

**Be sure to drink at least one glass of water before your sessions and one glass of water afterward.** Brainwave entrainment increases blood flow to the brain, and drinking plenty of water helps your brain rid itself of waste byproducts.

# Welcome to *Light at the Break of Midnight*

Dear valued listener,

These are powerful tools to aid us on our transformational journey, where we encounter and explore the mystery of the self, the mystery of existence, and the wisdom that lies in the depth of our souls.

The answer to every mystery, problem, or conundrum can be found in the depths of our souls, if we persist with honorable intentions, great courage, humility, and grit.

Let us not forget that when we walk our talk and what we know to do, the way opens. We find the only thing that is lacking in any situation is what we can do. C'est la (selah).

With great love and respect,

# About Light at the Break of Midnight

We created this collection to offer inspirational stepping-off points for your inner discovery, conjuring imagery and a sense of journeying. Often, these types of soundscapes are created to bring the listener into a specific brainwave target, related to a certain theme, or have a given purpose as a tool or aid.

With these tracks, the intention was to compose soundscapes that can be used broadly, useful in many circumstances or purposes, and also with an emphasis on guiding the listener into the imaginal space, dream-like, imagery-triggering states to explore for pleasure, insight or healing. We are definitely pleased with the results, and hope you will be, too.

- Potential to interact with higher intelligences

# How to use Light at the Break of Midnight

We created this collection to offer inspirational stepping-off points for your inner discovery, tracks that are each unique and yet conjure imagery and a sense of journeying. These are best listened to while in a comfortable position and with your eyes closed, although there is no harm in doing the dishes while listening to these, just don't drive with these playing!

I would recommend taking a few deep breaths in order to trigger the body into the relaxation state while sitting or lying down. These tracks can be listened to by either using headphones or other stereo players – the entrainment is not conditional in this regard. Both tracks have the same broad span of usage: they can be a useful adjunct to meditation, or for holding a comfort space for healing, or sponsoring insight and altered perspectives of situations and feelings. Let your experience unfold naturally, going with the flow, or use your intention to guide your experience.

- Guide yourself into altered states easily
- Enjoy dream-like experiences
- Use for calming and relaxing
- Perfect for meditative practice
- Useful for help with falling asleep
- Explore the imaginal space
- Boost your creativity
- Great for guided imagery
- Use while engaging in self-hypnosis

## Brainwave Patterns Targeted

This collection was designed to encourage both alpha and theta brainwave activity. We wanted to create the ideal brainwave/bio conditions to propagate mental imagery and inner experience of the senses. In essence, we wanted to push the listener towards a dreaming-awake type of state.

Alpha waves can amplify your clarity and imagination and boost your performance and creativity. They are said to be the “artist’s brain waves,” where new ideas and solutions are sparked and you connect to your inner playful state of clarity and wisdom. Alpha helps you become fully present in a state of multidimensional awareness, which increases problem-solving capacity, and you may even experience a sense of deep connection, belonging, and flow. Alpha is also fundamental to our spiritual growth, since we need a strong alpha in order to establish connections during states of trance, deep meditation, and dream sleep.

Theta brain waves are naturally occurring during the hypnagogic state (pre-sleep), REM sleep, and often predominate during deep meditation and healing states of visualization, hypnosis, trance, and psychonautic exploration. This brainwave bandwidth is typical when awareness of the information coming in through our physical senses decreases, as we turn our attention inwards and our body

rhythms (heart and breathing rates) slow down. It’s the gate to our buried memories, unresolved issues, and emotional trauma, and reviewing this material can sometimes be unpleasant as we might access and feel our raw emotion (previously suppressed). Even though REM sleep already serves that purpose, it is important to include deep relaxation exercises in our routines, so healing and restoration of mind can occur. Theta brain waves are related to insight, visualization, and deep states of meditation, although they can also make you drowsy and be responsible for distractibility, moodiness, and lack of focus.

## **Soundtrack Details from the Creator, Leigh Spusta**

We primarily employed the use of a psycho-acoustic compositional method in order to evoke imagery and readiness to experience a range of emotion. This is done by the interplay of tension and resolution between musical intervals, and the specific use of textures and timbres that provoke certain reactions in people.

These tracks were composed with a 432 Hz tuning so as to be in better alignment with sacred geometry, nature, and spiritual energies.

Although there are plenty of naturally occurring binaural beats in these tracks, we did not employ the use of any hard line target frequencies, no binaural beats, and no isochronic tones. We have relied on the composition itself to have all the necessary cues and evocative sensibility to move the listener into the ideal space to experience the imaginal realm.
